

CAREERS

Students are encouraged to begin a career search prior to the ninth grade year. Proper course selection throughout high school is an integral part of preparing for college, choosing a college major, and developing appropriate career skills. Students and parents need to periodically refer to these websites in order to keep current with occupational related changes that might have a bearing on preparation for college and the workplace.

www.ms.bridges.com This site allows students to learn about themselves through individualized assessments and then connect their high school course plans, college options, and career goals.

www.careervoyages.gov Reveals industry profiles along with career videos designed to assist parents and students with career planning.

www.collegeispossible.org Information is presented about choosing the right college, preparing for college, and paying for college.

www.acinet.org Career exploration and videos are highlighted on this website.

www.khake.com/index.html Careers, job descriptions, necessary job skills, and salaries are available on this website.

www.mdes.ms.gov Occupational wages, job demand projections, and a job search for Mississippi jobs are included on this site.

www.bls.gov The National Occupational Outlook Handbook is included on this site along with reports of wages by geographic area and occupation.
